Abbas Saleh

Civil Engineering Student | Toronto Metropolitan University | Autodesk Certified User – Revit

(647) 674-5424 • abbas.k.saleh@gmail.com • linkedin.com/in/abbas-saleh-0a9540368 • abbassaleh.com • Mississauga, ON

Prepares checkable calculations, drawings and material takeoffs; documents assumptions and limits; escalates questions early.

Education

Toronto Metropolitan University Toronto, ON

Bachelor of Engineering, Civil Engineering *Sept. 2025 – Apr. 2029 (expected)*

- **Coursework:** Strength of Materials I & II, Graphics, Materials Science; **current:** Fluid Mechanics, Surveying, Probability & Statistics, Engineering Communication

Experience

Project Coordinator June 2026 – Sept. 2026

Bay & York Development Group *Toronto, ON*

- Primary point of contact across five consulting disciplines (structural, civil, geotechnical, planning, landscape) and legal counsel on a mixed-use development in Vaughan: five- and six-storey buildings, ∼182 residential and seniors-living units, 15,400 sq. ft. commercial
- When the City of Vaughan raised concerns with the existing retaining wall, coordinated drawing reviews and technical correspondence with the structural consultant (Gravity Engineering); helped advance the adopted solution, integrating the retaining function into the underground parking structure and **eliminating a separate replacement wall**
- Tracked consultant deliverables, municipal comments and design revisions across multiple submission cycles; issued agendas and action logs, closing each item with the responsible licensed professional

Engineering Intern Apr. 2026 – June 2026

Zee Design & Build Inc. *Greater Toronto Area, ON*

- Followed the principal P.Eng. through beam and slab calculations for a medical building, then saw the slab built on site
- Tied reinforcing steel, built formwork, and placed and finished concrete for the slab under site safety procedures
- Revised interior renovation plans in AutoCAD under the P.Eng.'s direction

Projects

Maintenance Platform: Verification Package | *Mathcad, Excel, Robot, AutoCAD, Revit* Oct. 2026

- Analyzed a steel access platform (W-section beams, joists, HSS posts) under dead, live and equipment loads, checking beam bending, shear and deflection and post buckling, with guard loads cited and flagged for review
- Verified results by independent hand calculation in Mathcad, an Excel calculation sheet and a Robot frame model, reconciling all differences; one input sheet records units, assumptions and sources
- Issued AutoCAD framing plans, sections and general notes under revision control; built an independent Revit model and logged drawing-to-model discrepancies in a review register, closing each in the next revision
- Prepared an Excel material takeoff reconciled to the Revit steel schedule
- Issued for P.Eng. review; comments logged and next revision in progress. Brief states limits (elastic analysis, not a CSA S16 design check)

Conveyor Gallery Truss: Member Force Verification | *Robot, AutoCAD, Excel* Oct. 2026

- Solved a Pratt truss under walkway and conveyor loads by method of joints, spot-checked by method of sections, and matched every member force against a Robot model
- Drafted an AutoCAD elevation and member-by-member MTO; trial sections labelled not design-checked

Literature Review: Modular Access Platforms vs. Scaffolding in Hydropower Maintenance Oct. 2026

- Compared fall-hazard exposure, installation time and inspection effort using a case study, Ontario fall-protection rules and injury data; ends in questions for senior decision

Safety Certifications & Skills

Safety: Working at Heights (Ontario), Worker H&S Awareness (MLTSD), WHMIS (CCOHS), Aug. 2026; **Autodesk Certified User: Revit** (Oct. 2026)
Analysis: Mathcad Prime, Microsoft Excel, Autodesk Robot Structural Analysis, hand-calculation verification
Drafting & Modelling: AutoCAD, Revit (schedules, model review)
Languages: English (fluent), Arabic (native)
